

6-99
years

Playing LYNX 400 will test your reflexes and observation skills while you have fun with your opponents.

Contents: 1 board with 9 parts • 401 picture cards
• 18 coloured chips • 1 folding box.

BOARD GAME

SETTING UP

Set up the board in the centre of the table, slot in all the pieces of the puzzle. The order doesn't matter, that way no game is ever the same. Put the box together by inserting the sides into the hexagonal plastic base and then put the picture cards inside. Give each player three round chips of the same colour. Choose a leader and one of the game formats, A or B. And... get ready, the game's about to begin!

GAME A

In this option, the leader can also play. The leader deals each player 3 picture cards face down. Once the pre-agreed signal is given, the game begins. Players look at their cards and look for the matching pictures on the board. When they find them a coloured chip must be put on top of each picture. The first player to find all 3 pictures shouts "Stop!". Play is immediately halted and the other players must stop looking for their pictures.

Once the pictures and chips have been checked, each player collects the picture cards they've found. The others are put back into the box and the cards are shuffled. The coloured chips are then removed from the board. The leader deals each player 3 new cards and a new round begins. This continues until one player has collected 25 picture cards or there are no cards left. And so on. The first player to win the most cards wins.

GAME B

In this option, each player receives a different coloured chip. The leader (who can't play in this option) chooses a card from the box and shows the players who must then locate the picture on the board. The first to locate the picture puts their chip on top of it.

Play is halted, the player removes their chip and wins the card. The first player to win 15 cards wins.

PENALTIES

- If a player puts the wrong chip on the board, they must return that picture card and the one they had previously won. These are put back in the box.
- If a player repeatedly obstructs the board they will be penalised. They can choose either to return a card to the box or sit out the following round.

APP instructions

Set up

This version of Lynx comes with a free app for tablets so players can enjoy a more interactive experience and new game options.

- 1 Download the free Lynx **app** on Google Play and Apple Store. Available for tablets with screens over 6".
- 2 Once you've downloaded it you're ready to play.
- 3 Discover the various game options:

Create a profile. You can create up to 10 different profiles although the maximum number of players is 6 per game. Choose an existing photo or take a new one, change the name and you've created your profile. Profiles can be created and deleted at any time. Choose your colour; there are 6 colours to choose from which are the same as the coloured chips. Choose the same coloured chip and you're ready to play.

Individual game. 1 player

Traditional option. A picture will appear on the screen which you have to find on the board using your device. Hold the device steady over the picture. You don't need to use the magnify option. Your device will immediately recognise whether the picture is correct or not.

Surprise option. A picture will appear on the screen which you then have to find on the board using your device. The picture may be pixelated, in black and white or in 4 parts. Hold the device steady over the picture. You don't need to use the magnify option. Your device will immediately recognise whether the picture is correct or not.

Various players. 2-6 players

Traditional option. Each player will see a picture on the screen which they must then find on the board. The first player to find it places a coloured chip on top and taps their profile on the screen. The other players confirm whether or not that player has found the right picture by tapping Yes or No on the screen.

Surprise option. A picture will appear on the screen which all players have to locate on the board. The picture may be pixelated, in black and white or in 4 parts. The first player to find it places a coloured chip on top and taps their profile on the screen. The other players confirm whether or not that player has found the right picture.

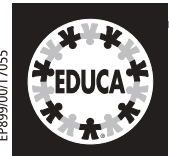

One for all game. One picture appears on the screen for all the players. The first player to find it places a coloured chip on top and taps their profile on the screen. The other players confirm whether or not that player has found the right picture.

Classification.

You can check the classification at any time. Any deleted profile information will remain in the classification but without a description.

Conform to the requirements of U.S.
ASTM Standard Consumer Safety Specification for Toy safety F963

WARNING!
Not suitable for children under 3 years. Small parts. Choking hazard. Keep this information for future reference. Images that appear on the box may be slightly different than the contents.
